Current Work Experience

Aon Consulting Pvt. Ltd., Bengaluru as **Senior Consultant** | **Lead UI/UX Designer** | **Lead UX Reviewer** | **Product Designer** (31-Oct-2022 to *till date*)

I am part of Aon's Impact Forecasting's software team. It consists of catastrophe model development and software product development.

- ➔ **Software Model:** Developed a design-to-develop Rapid Prototype using Adobe XD for the whole ELEMENTS software modelling service. Implemented user experience strategies in line with business objectives and expertise in interaction design and information architecture.
- ➔ **Impact Forecasting Toolkit Web Application:** Lead the Risk Mapping Tool as a UI/UX design reviewer for the entire project. Mentor, and inspire a team of experience designers, fostering collaboration, and promoting professional development through coaching and performance management.
- ➔ **Florida Loss Commission (FLC) Team Review:** Directed the annual UI/UX strategy for the US Florida Loss Commission (FLC) review, presenting interactive flow prototypes to facilitate regulatory approval.
- ➔ **Documentation/Integration Testing:** Product Feature Testing and Creative Reporting with latest AI Presentation.

Previous Work Experiences

Capgemini Technology Services India Ltd., Bengaluru as **Senior Consultant** | **Project Lead in Front-End Design** (19-Feb-2018 to 21-Oct-2022)

Find below my roles and responsibilities that I worked in the Capgemini projects:

Various Projects handled within Capgemini

1. Type of Industry: Finance (Microsoft)

Project Description: Recreate an all new UX Design for the existing reporting website. Modernization of Data Visualization in every aspect.

Role/Title: Lead - UX Designer

Project Duration: Apr 2022 – Oct 2022

Responsibilities:

- ➔ Lead the design team, conduct user research, and collaborate with other stakeholders to ensure user-friendly and intuitive designs.
- ➔ Prepare and present rough drafts to internal teams and key stakeholders
- ➔ Develop quick mockups for our development and design team
- ➔ Track usability goals and prepare reports for senior management
- ➔ Coordinate with UI design team

Operating Systems/Software/Languages: Windows, HTML 5, CSS3, Adobe Illustrator, Adobe Photoshop, Pixlr (Online Graphic Editor)

Special Tools: Wireframing & UI Design (Figma)

2. Type of Industry: Microsoft Azure Technology (Microsoft)

Project Description: Creation of a static Landing Page which promotes different ISVs of the Microsoft Azure Platform Model. The major task is to convert the normal Word Documentations to creative & interactive HTML Pages.

Role/Title: Module Lead, UI/UX Designer, Word expert (HTML/CSS/Word)

Project Duration: Nov 2021 – Oct 2022

Responsibilities:

- ➔ Creation of quick Landing pages for GitHub
- ➔ Worked on Mobile First Bootstrap Layouts for UI Design.
- ➔ Provide support to the customer during UAT and post production support as part of maintenance
- ➔ Handling Wireframes/Prototypes for the proposed UIs.
- ➔ Worked on Images and Icon creation wherever required to customize the Landing page.
- ➔ Worked on CSS Framework (Bootstrap 4/5) and HTML5/CSS3
- ➔ Rapid conversion of Word Document to HTML pages in modern UI format.

Operating Systems/Software Tools: Windows, SharePoint, HTML 5, CSS3, Adobe Illustrator, Adobe Photoshop, Pixlr (Online Graphic Editor), Wireframing & UI Design (Figma)

3. Type of Industry: Learning & Development

Project Description: Creation of a completely new UI for an existing internal webpage in terms of Learning & Development. This Project gives the End User a completely new look & feel of the functionalities related to the Skills, Learnings & Certifications related to the Employees within the Organization Globally according to their Grades & Roles.

Role/Title: Project Manager | UI/UX Designer (SharePoint Platform - Capgemini)

Project Duration: July 2021 – Nov 2021

Responsibilities: End-to-end Project Management as a Scrum Master. Handled the entire project from start to finish (including the Stakeholders requirements to delivery). Along with the Project deliverables, I have taken up the UI Designer role in the project (Complete UI Layout design of the project).

- Creating project UI Layout for further SharePoint Development
- Project Goal setting | Tracking | Timelines
- Regular Documentation of every single task and updating the same in DevOps tools.
- Handling project correspondence at all levels
- Worked on Images and HTML/CSS wherever required to customize the SharePoint Modern Pages.
- Worked in complete Agile Methodology with multiple sprints.

Operating Systems/Software Tools: Windows, SharePoint, HTML 5, CSS3, Adobe Illustrator, Adobe Photoshop, Pixlr (Online Editor), Wireframing & UI Design (Figma)

4. Type of Industry: Healthcare (AtriCure)

Project Description: Content management of multiple client websites related to healthcare. Develop and maintain two-three websites related to the client requirements. (WordPress/Drupal)

Role/Title: Module Lead | Front-End Design (Content Management System)

Project Duration: April 2019 – Jun 2021

Responsibilities:

- Handling an entire Sub-Project (<https://www.actagainstaflib.com>) in CMS (WordPress 5)
- Creating new UI Design with latest Bootstrapping for (<https://www.atricure.com/>)
- Delivered 200+ User Stories with 95% On Time Delivery
- Regular Documentation of every single task and updating the same in DevOps tools
- Handling end to end projects along with latest CMS tools and Front-End Frameworks
- Coordinate with the Customer and the Onsite counterpart for requirements, Project Estimation and Delivery
- Handling project correspondence at all levels
- Working on Images and Graphics as and when required in the Project accomplishments for each position

Operating Systems/Software Tools: Windows & Mac, WordPress 5, Drupal 8, Bootstrap 4, PHP, MySQL, JavaScript, jQuery, HTML 5, CSS3, Wireframing (Figma, Zeplin, Sketch, Wireframe CC)

5. Type of Industry: Content Management/Document Management (HP)

Project Description: The HP BI Factory held an existing CMS Web content called Confluence for which a new alternative Creative Web layout was proposed.

Phase I: Wire-framing of the newly proposed Layout

Phase II: UI Designing for the approved wire-framing using Bootstrap.

Phase III: Implementation of the UI Design to a new CMS Tool (WordPress)

Role/Title: GUI Designer/HP BI Factory (UI Designing and CMS)

Project Duration: January 2019 – February 2019

Responsibilities:

- Detailed review on the existing CMS Tool (Confluence).
- Creating new Wireframes/Prototypes for the proposed UI.
- Creating Bootstrap Layouts for HP BI Factory UI Design.
- Implementation of UI Design in CMS (WordPress).
- Creating various Icons, Flash GIFs for the Graphical presentations.

Operating Systems/Software Tools: Windows 10, Adobe CC, Bootstrap, Wireframe CC, WordPress

6. Type of Industry: FMCG (P&G)

Project Description:

Module I: Automated font conversion process – To convert the User Inputted Fonts to its relevant substituted Font which is available in the Client's Font Server.

Module II: Image Flattening of Multiple Creative – To flatten the layers of the input files (Adobe Illustrator format) to just 2 layers (Text and Background)

Role/Title: Project Lead/Adobe Illustrator-Visualization (Font Scripting & Image Flattening)

Project Duration: February 2018 – June 2018

Responsibilities:

- Worked on Automation of Font Scripting and Image Flattening.
- Reviewing the process of Font Conversion Scripting
- Handling project correspondence at all levels

Operating Systems/Software Tools: Windows 10, Adobe Illustrator CC 2017, Adobe Scripting
